

Action Group Extended (AGX) Manual

Mod Overview

Main Window (Selected Parts Window) in Editor.

- 1) Selected Parts List: Shows currently selected parts.
 - Left: No Parts Selected, Show List of All Parts button available, click to show All Parts window.
 - Right: 2 Solar Panels Selected. Click a part to remove it from the list.
- 2) Actions List: Shows Actions available on the currently selected parts.
 - Left: No parts selected, so no actions available.
 - Right: Actions available on the solar panels. (Includes additional actions from other mods, note the scroll bar.) Click action to assign it to the current action group.
- 3) Selected parts in symmetry?
 - Green (Yes): When a part is clicked in 3D game space, any parts placed in symmetry will be selected with it also.
 - Red (No): When a part is clicked, only that part will be selected.
 - Click to change between modes.
- 4) Clear List.
 - Click to clear selected parts list to return window to left side state and make All Parts button available.
- 5) Current Group Display
 - Number: The currently selected group, group 1 in these pictures.
 - Text (if present): Player entered description of the group.
 - Click to display Groups Window if Groups Window Auto-Hide enabled.
- 6) Group Description Text Box
 - Text entry box where you can enter description of the current action group.
 - Click to enter text entry mode, click anywhere else to leave text entry mode.
- 7) State Visibility: Display the state (on/off/mixed) of the action group in flight mode.
 - No (gray): Display group as typical gray text in flight mode.
 - Yes (green): Display group as off (Red), on (Green), or mixed (Yellow) in flight mode.
 - Click to change mode for the current group.
 - See State Visibility section.
- 8) Tap/Hold mode.
 - Tap (gray): Typical key behavior, tap key to activate group.
 - Hold (red): Brake key behavior, press key to activate group, release key to deactivate group.
 - Click to change mode for the current group.
- 9) Show group in Group Visibility groups.
 - Click on number to enable (green)/disable (red) the current group in that Visibility Group.
 - See Group Visibility section.
- 10) Assigned KeyBind for the current group.
 - Click to display Keybinds window.
 - See the Keybinds section.
- 11) Assigned KeySet.
 - Click to display KeySet/GroupVisibility window.
 - See both the KeySets and Group Visibility sections.

Main Window in Flight Mode

- 12) Prev Docked/Next Docked buttons.
- Cycle through docked Sub-Vessels on the current vessel. See the Sub-Vessel section.

Groups Window

- 1) Other button.
 - Switch between Numbered Action Groups mode (left) and Named Action Groups Mode (Right).
 - If in career mode and SPH/VAB is not fully upgraded, this button will not appear and only Named Actions Groups Mode will be available.
- 2) Numbered action groups list.
 - Click on a group to change the current action group.
 - A group that is green has actions assigned to it. (Not shown in current picture, to be fixed.)
- 3) Action groups pages.
 - 50 Action Groups per page.
 - Red number is currently selected page.
 - Green number is other page that has actions assigned, so the green 3 means that there is an action assigned in groups 101 through 150.
- 4) Named Action Groups list.
 - Click to change the current group, current group is highlighted in green. (Not red, to be fixed.)
 - There is no highlighting for other action groups with actions assigned. (To be fixed.)
- 5) List of actions assigned to the current named action group.
 - Click an action to unassign it.
